

## News Release

7 June 2023

### Perenco and Bloom Energy to Deploy Solid Oxide Fuel Cells in the United Kingdom

Bloom Energy (NYSE:BE) has signed an agreement with Perenco to install 2.5 megawatts (MW) of Bloom's solid oxide fuel cells at a site in England. Perenco is a leading independent hydrocarbon company, producing 500,000 BOE of oil and gas per day from its operations in 14 partner countries.

The Bloom Energy Server® platform, to be delivered in late 2023, will be installed at Wytch Farm in Dorset, England, the largest onshore oil field in western Europe, where it will be used to support Perenco's baseload requirements. (Photo: Business Wire)

The Bloom Energy Server® platform, to be delivered in late 2023, will be installed at Wytch Farm in Dorset, England, the largest onshore oil field in western Europe, where it will be used to support Perenco's baseload requirements. The agreement marks the first deployment of Bloom fuel cell technology in the United Kingdom.

*"This is an important step that will demonstrate how our solid oxide fuel cell technology supports the resilience and sustainability goals of our energy-intensive clients,"* said Tim Schweikert, Senior Managing Director of International Business Development at Bloom Energy.

*"Perenco has always been a pioneer in innovation and long-term investment in the countries where we operate,"* said Benoit de la Fouchardiere, Perenco CEO. *"Today's announcement is another important step as we continue to reduce our emissions wherever we work. We look forward to a successful initial deployment at Wytch Farm and to then expanding the use of the technology into other global operations sites."*

The agreement with Perenco is another major step in Bloom's expansion in Europe, following the recent sales agreement for northern Europe with Elugie, a marketing partnership agreement with Telam for Spain and Portugal, and energy platform sales to Cefla and Ferrari in Italy announced in 2022.
